

JOB PROFILE

Job Title: VP/Director, Cell Therapy

Department	Type	Location
Center of Precision Therapy	Full-time	Chengdu, China

Job Summary:

We are seeking a highly talented and motivated cell therapy expert to join our precision therapy team and support our innovative cell therapy activities.

Key Responsibilities:

- Design, implement, and lead the strategic development of CAR-T/NK cell therapy products.
- Responsible for continually improving the CAR-T/NK R&D platform to meet domestic and foreign regulatory requirements.
- Guide the research and development of plasmids, viruses, and CAR-T/NK products.
- Effectively lead the clinical development of CAR-T/NK cell therapy projects from IND submission to BLA filing.

Position Requirements:

- PhD in cell biology, immunology, virology, or biochemistry, with 7+ years of related industrial experience. 5+ years of direct cell therapy R&D experience, especially for CAR-T and/or NK cell therapies.
- Hands-on cell therapy research and development experience is required. The applicant must be familiar with the recent development trends and current landscape of innovative cell therapy technologies. The applicant must be familiar with relevant domestic and foreign regulations for cell therapy products.
